德硅凯氟
DESIOPTOE

DESIOPTOE is a professional infrared optics supplier. Our infrared optical materials and components have excellent optical properties and have been verified by industry-leading companies.

DESIOPTOE has been focusing on fluoride crystal growth (**CaF₂**, **BaF₂**, **MgF₂**, **LiF** and etc.) for more than 20 years, and we are equipped with sufficient fluoride crystal production capacity.

DESIOPTOE also provides other infrared material optical components, such as **silicon**, **germanium**, **ZnS**, **ZnSe**, **sapphire**, **fused silica**, and more, together with our quality partners.

DESIOPTOE has established a professional precision optical production line to produce **standard and customized infrared optical components and blanks** (such as windows, prisms, lenses, mirrors, filters and cylindrical lenses, etc.).
